Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al.

Yamamoto et al. (US 6,047,544) discloses a catalyst for exhaust gas purification comprising a monolithic substrate, a first layer comprising a zeolite hydrocarbon adsorbent formed on the substrate, and a second catalyst layer comprising any one of palladium, platinum, and rhodium (column 1, line 64 – column 2, lines 1-5). It is further taught that the catalyst may include a third layer comprising rhodium (column 2, lines 35-38). The catalyst layers include alumina (column 7, lines 10-15 and column 8, lines 1-15). With respect to the language of the claims the coating layer is considered to correspond to the first and second catalyst layers taught by the reference. The third layer taught by the reference is considered to correspond to the second catalyst metal, where the catalyst metal is loaded on both the front and rear stage part of the coating layer.

As each and every element of the claimed invention is taught in the prior art as recited above, the claims are anticipated by Yamamoto et al.

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed October 21, 2005 have been fully considered and are in part persuasive. Applicant's arguments with respect to the first and second catalyst unit are noted. The rejection over the Yamamoto reference has been clarified to make it clear that it refers only to the first catalyst unit. Therefore, all of the layers are on the same catalyst support.

Conclusion

5. Because the rejection over the Yamamoto reference has been clarified and revised, the rejection is non-final.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christina Johnson whose telephone number is (571) 272-1176. The examiner can normally be reached on Monday-Friday, 7:30-5, with Alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
